Unitas System

1. System Overview

Unitas is an internal web-based platform developed by Limbo Software Development for Change.org. The system is designed to support the collection, organization and visualization of daily work activities performed by employees, primarily through integration with internal communication tools such as Slack. In addition, it enables the generation of structured reports at the level of individuals, teams and projects.

The platform is not intended for public use. Its scope is limited to employees of Change.org, who interact with the system within the context of their professional responsibilities.

2. Delivery Model and Responsibility

The development of Unitas follows a product-based model. Limbo Software Development is responsible for the design and delivery of the system, while Change.org assumes responsibility for its implementation, operation and ongoing management once deployed.

This distinction is relevant from a data protection perspective. Although the system is developed externally, the entity that determines the purposes and means of data processing, and that maintains the direct relationship with users, is Change.org. Therefore, Change.org acts as the data controller in relation to the personal data processed through Unitas.

3. International Scope

Given the international presence of Change.org, the Unitas system may be used by employees located in different jurisdictions. While this document is developed within the framework of Mexican data protection law, it is important to recognize that the operation of the system will fall under broader regulatory standards, such as the General Data Protection Regulation in the European Union.

For this reason, the design of the system and the present proposal take into account general data protection principles, including purpose limitation, proportionality, data minimization and security.

4. Personal Data Processed

The Unitas system processes a limited set of work-related personal data. This includes identifying information such as the employee's name and corporate email address, as well as technical

identifiers like the Slack username and system credentials used for authentication. In addition, the platform stores work activity entries, which form the basis for internal reporting.

The system also allows the optional upload of profile images and team images. These images are not required to be personal photographs and may consist of icons, logos or other visual elements. However, any image uploaded by a user is stored within the system and becomes part of the associated account or team environment.

Importantly, the system is not designed to collect or process sensitive personal data.

5. System Integrations

Unitas interacts with internal tools to support its functionality. In particular, it integrates with Slack in order to collect and structure activity-related information. The system also sends email communications to registered corporate addresses. These communications are strictly operational and may include notifications related to access, account recovery, system alerts or report delivery. They are not intended for marketing or external purposes.

Privacy Notice - Unitas System

1. Identity and Address of the Data Controller

Change.org (hereinafter, “the Controller”), with registered address at 548 Market St, PMB 29993, San Francisco, California 94104-5401, USA, is responsible for the processing of personal data collected through the Unitas system. For any matters related to this Privacy Notice or the processing of personal data, users may contact:

Email: privacy@change.org
Responsible Area: Data Privacy Department

2. Personal Data Collected

For the purposes described in this Privacy Notice, the following personal data is collected:

- Full name
- Corporate email address
- Slack username
- Authentication credentials
- Work activity records
- Optional profile image
- Optional team image

The system does not collect sensitive personal data.

3. Purposes of Data Processing

Personal data will be processed for the following purposes:

A. Primary Purposes (necessary for system operation)

- To manage user authentication and access to the Unitas system
- To record and organize daily work activities
- To generate structured reports related to employees, teams and projects
- To integrate internal workflows through Slack
- To send operational email communications, including notifications, alerts and reports

B. Secondary Purposes (optional)

- To personalize the user interface through optional profile or team images
- To perform internal analysis aimed at improving system performance and organizational workflows

Users may object to the processing of their data for secondary purposes by contacting the email provided in this Privacy Notice.

4. ARCO Rights and Revocation of Consent

Users have the right to access their personal data, request its rectification, request its cancellation, or object to its processing (ARCO rights).

To exercise these rights, users must submit a request to:

Email: privacy@change.org

The request should include:

- The name of the data subject
- A clear description of the data or rights to be exercised

The Controller will respond within a maximum period of 20 business days, in accordance with applicable legal provisions.

5. Data Transfers

Personal data may be shared with internal systems operated by Change.org, as well as with technological tools necessary for the operation of the platform, including Slack integrations and email delivery services.

Such transfers are limited to what is necessary for the proper functioning of the system. Where applicable, international transfers will be carried out in accordance with relevant data protection regulations.

6. Security Measures

The Controller implements administrative, technical and organizational measures to protect personal data against unauthorized access, loss, alteration or misuse.

These measures include authentication controls, role-based access restrictions and secure handling of credentials. The system does not perform biometric identification, facial recognition or automated image analysis.

7. Data Retention

Personal data will be retained only for the time necessary to fulfill the purposes described in this Privacy Notice or to comply with applicable legal obligations. Once the data is no longer required, it will be appropriately deleted, blocked or anonymized.

8. Changes to the Privacy Notice

The Controller reserves the right to modify this Privacy Notice at any time. Any significant changes will be communicated through internal channels or system notifications.

Academic Note on the Use of Artificial Intelligence

The preparation of this document involved the use of artificial intelligence tools as support for drafting, structuring and refining the content. These tools were used to assist in organizing ideas, improving clarity of expression and adapting the document to a formal academic format. The use of AI did not substitute at all the process of analysis and planning of the activity, but was however used as a tool to evaluate and improve the effectiveness of the resulting document.
